

SSH66TE Series

Short Switch for 3/4" NPT External Fitting

SSH66TE are externally mounted horizontal float switches with reduced length floats for applications where space is restricted. The float is of 316L Stainless Steel and the stem is of 304 Stainless Steel.

These devices are easily mounted, using 3/4" NPT, without needing internal access to the tank/vessel into which they are being fitted.

These are available with either 1 metre flying leads or with a DIN43650 connector.

The switch action may be reversed by mounting the device with the float able to move upwards away from the body, instead of the more normal downwards direction.

- External Mount (3/4" NPT)
- Short Insertion Length
- Stainless Steel 316L Float
- Connection with DIN 43650 Plug or 100cm wires
- N/O or N/C switch action
